Module title:	Software Engineering 2
Topic:	Weekly Submission 3: Chapter 3, Requirements (SRS), System Design and Development Evidence
Client:	NB: Write Your Own Client. Here based on the project you are doing
Submission due:	Friday, 16 October 2026 by 12pm

ACTION REQUIRED: Weekly Submission 3

WEEK 1	WEEK 2	WEEK 3	WEEK 4	FINAL
Proposal 2 Oct (Done)	Chapters 1 and 2 9 Oct (Done)	Chapter 3 and Design 16 Oct	Build and Test 23 Oct	Dissertation, App & Demo 29 Oct

This week you define what the system must do, how it will be built, and you design it. Submit a **draft** of Chapter 3 (Requirements & Methodology), the design sections of Chapter 4, your SRS, and evidence that development has started. From this week, **coding must run alongside your documentation** so that you have a working application to test and demonstrate.

WHAT YOUR GROUP MUST SUBMIT

#	DELIVERABLE	WHAT IT MUST INCLUDE
1	**Chapter 3: Requirements & Methodology (draft)**	Use the Chapter 3 template (folder 03). Stakeholders and users; functional requirements (ID, description, priority); non-functional requirements; how requirements were gathered; SDLC/Agile methodology justified against an alternative; use cases or user stories; ethical, privacy and security considerations.
2	**Software Requirements Specification (SRS)**	Use the SRS template (folder 03). The complete requirements list that Chapter 3 summarises and that your testing will trace back to.
3	**Chapter 4: System Design (sections 4.2 to 4.5)**	System architecture diagram; UML (use case, class, activity and sequence as relevant); ERD with entities, keys and relationships (Database Design Template); UI wireframes or prototype; justified technology stack.
4	**Development evidence**	Repository with project structure, database schema script and first commits from every member. Core features must be under way.
5	**Revised Chapters 1 and 2**	Updated using the feedback you received on Weekly Submission 2.
6	**Weekly Progress Report & updated registers**	Use the Weekly Progress Report and the Risk, Issue and Change Register (folder 09). Update your work plan.

HOW YOU WILL BE ASSESSED (SPM622 PROJECT ASSESSMENT RUBRIC)

Weekly drafts are marked against the criteria below. Marks shown are out of 100; at the end of the project the total is converted to a mark out of 40.

RUBRIC CRITERION	MARKS	WHAT AN EXEMPLARY SUBMISSION SHOWS
3. Requirements & Methodology	10	Stakeholders identified; prioritised, testable requirements; documented gathering evidence; justified SDLC/Agile approach; use cases or user stories; ethics, privacy and security addressed.
4. System Design: UML, Architecture, Database & UI	12.5	Clear architecture diagram; readable, consistent UML; ERD with keys, relationships and normalisation; wireframes with usability reasoning; design traces to requirements.
5. Software Implementation & Functionality	20	Starts now: core features under development and matching the design.
6. Version Control & Team Development Evidence	7.5	Commits from every member with descriptive messages; feature branches.
1 and 2 (revised chapters)	10 + 10	Feedback applied; research questions answered by the requirements; deeper comparison of similar systems; corrected Harvard citations.

COMMON MISTAKES TO AVOID

- Choosing a methodology (e.g. Agile or Scrum) without explaining why it suits your project and team.
- Requirements that are vague or cannot be tested (e.g. 'the system must be fast').
- Diagrams that are unreadable, unlabelled or do not match your requirements.
- Leaving all coding for the final week. Every member must have commits in GitHub.

SUBMISSION REQUIREMENTS

Due Friday, 16 October 2026 by 12pm for Review

- **Document Format:** One PDF per group, named GroupNumber_Week3.pdf, with your GitHub link on the first page. Attach the SRS as part of the same PDF.
- **Submission Portal:** The Group Lead submits once per group to Amenda Raganya (your Supervisor) via Teams by 12pm Friday.
- **Review Process:** Amenda Raganya (Project Supervisor) will review your draft against the rubric above and give feedback so you can improve before the final submission.
- **Final Submission:** Thursday, 29 October 2026, complete dissertation, source code, evidence folders and presentation materials via Campus Online (Turnitin similarity below 15%).
