Module title:	Software Engineering 2
Topic:	Weekly Submission 4: Working Application, Chapters 4 and 5, Testing and Presentation Readiness
Client:	NB: Write Your Own Client. Here based on the project you are doing
Submission due:	Friday, 23 October 2026 by 12pm

ACTION REQUIRED: Weekly Submission 4

WEEK 1 Proposal 2 Oct (Done)	**WEEK 2** Chapters 1 and 2 9 Oct (Done)	**WEEK 3** Chapter 3 and Design 16 Oct (Done)	**WEEK 4** Build and Test 23 Oct	**FINAL** Dissertation, App & Demo 29 Oct

This is your last review before the final submission. Show that your application works, that you have tested it, and that your group is ready to present. Submit a **full dissertation draft** (Chapters 1 to 5), your working application, your testing evidence and your presentation plan.

WHAT YOUR GROUP MUST SUBMIT

#	DELIVERABLE	WHAT IT MUST INCLUDE
1	**Working application**	Core (must-have) requirements working with the database integrated. Submit a 3 to 5 minute screen-recorded walkthrough and access to the application. A live demonstration is still required at the final presentation.
2	**Chapter 4: complete (sections 4.6 to 4.8)**	Development environment; key modules and features with screenshots; version control (repository structure, branches, commits, pull/merge activity and each member's contribution).
3	**Chapter 5: Testing, Results & Evaluation (draft)**	Test strategy; test cases and results; defects and corrections; performance or usability evaluation with data; evaluation against your requirements; user or stakeholder feedback.
4	**Testing workbooks**	Test Plan, Test Cases and Results, Defect Log and Requirements Traceability Matrix (folder 06).
5	**Full dissertation draft**	Front matter and Chapters 1 to 5 in one document, revised using earlier feedback, with a short outline of Chapter 6. Check your Turnitin similarity now: the final limit is below 15%.
6	**Presentation plan & Individual Contribution Forms**	Slide outline and Demo Script (folder 11). Every member completes an Individual Contribution Form (folder 12) with Git evidence references.

HOW YOU WILL BE ASSESSED (SPM622 PROJECT ASSESSMENT RUBRIC)

Weekly drafts are marked against the criteria below. Marks shown are out of 100; at the end of the project the total is converted to a mark out of 40.

RUBRIC CRITERION	MARKS	WHAT AN EXEMPLARY SUBMISSION SHOWS
5. Software Implementation & Functionality	20	Working application meets all must-have requirements; database integrated; clean, organised code; validation and security; stable; README explains how to run it.
6. Version Control & Team Development Evidence	7.5	Meaningful commits from every member across the project; feature branches; pull/merge evidence.
7. Testing, Results & Evaluation	12.5	Test plan and test cases with expected and actual results; defects logged, fixed and retested; traceability to requirements; evaluation with data.
8. Documentation Quality & Final Dissertation	7.5	Complete structure; consistent Harvard referencing; labelled figures and tables; similarity checked.
9. Presentation & Live Demonstration	7.5	Planned story from problem to results; live demo of the key user journey; backup plan; formal business attire from every member.
10. Individual Contribution & Professional Response	2.5	Every member can explain their role, what they built and the problems they solved; forms match the Git evidence.

COMMON MISTAKES TO AVOID

- A demo that depends on mock-ups or untested features. Test before you record.
- Test cases without actual results, or an empty defect log.
- One member presenting or answering everything. Every member is assessed individually.
- Slides that simply repeat the dissertation. Tell the story from problem to results, then demonstrate.

SUBMISSION REQUIREMENTS

Due Friday, 23 October 2026 by 12pm for Review

- **Document Format:** One PDF per group (dissertation draft, test evidence and presentation plan), named GroupNumber_Week4.pdf, with your GitHub link and walkthrough video link on the first page.
- **Submission Portal:** The Group Lead submits once per group to Amenda Raganya (your Supervisor) via Teams by 12pm Friday.
- **Review Process:** Amenda Raganya (Project Supervisor) will review your draft against the rubric above and give feedback so you can improve before the final submission.
- **Final Submission:** Thursday, 29 October 2026, complete dissertation, source code, evidence folders and presentation materials via Campus Online (Turnitin similarity below 15%).
